

Of Wousts and Frowls

Susie Vrobel 2007

Although the hursts were browling low,
There was no frowl asprite.
The priggly wousts with all their jubs
Could not preclust the grite.
And this was not lucrustious
As all their scomes were twite.

Then grimpingly the frowls apprived,
Deglumping all the hursts.
And in a sudden humblewee,
They set the grite in pursts.
Which went quite appermisingly
Considering the dirsts.

The wousts were incompringible
And metormized the frowls:
"The grite was not preclustable!
We couldn't take deprowls.
For all we could asomminate
Were useless mangerowls."

So finally the wousts ascent
To better prew their browls,
Which could not but at once aspert
And culdify the frowls.
For this was not their sust assinct
To save the wousts' distrowls.
